SUMMARY

Software Engineering fresh graduate from COMSATS University Lahore (CGPA: 3.39) with hands-on experience in full-stack web and mobile development. Skilled in building scalable applications using Next.js, Flutter, MongoDB, and REST APIs, with additional experience in AI integrations and agile development workflows. Eager to contribute to client-focused software solutions in a collaborative, professional environment and learn from it.

SKILLS AND STRENGTHS

Programming: Java, JavaScript, TypeScript, Python, HTML, CSS, Dart

Frameworks & Technologies: Next.js, Node.js, Flutter, Unity, Payload

Databases: SQL, MongoDB, Firebase, Qdrant, PostgreSQL

Web & API: REST APIs, Safepay

Tools: Git, Jira, HuggingFace

PROJECTS EXPERIENCE

DOMA – Design & Buy (Next.js · Flutter · MongoDB · Payload CMS · HuggingFace · QdrantCloud · Unity)

- Built an AI and AR powered multi-vendor home decor e-commerce platform across web and mobile, integrating a full e-commerce ecosystem with vendors, customers, and AI services.
- **AI Interior Designer:** Generates room redesigns using Replicate and Anthropic LLMs with real purchasable products from inventory, based on a user-uploaded room image.
- **AR Furniture Placement:** Unity and ARCore powered surface detection allowing users to place, move and compare furniture in their real space before purchasing.
- **RAG Assistant:** Recommends top products using Qdrant vector search and LLM retrieval. Includes automated 3D model generation via Modal and Hunyuan3D-2.
- Integrated SafePay payment gateway, Firebase authentication, and REST APIs across the full platform.

Starbucks Clone (Next.js · Strapi · Tailwind CSS · REST APIs)

- Built a production-grade web application using Next.js and Strapi CMS, achieving 95+ PageSpeed Insights score through optimized data fetching and API performance tuning.

Formulated – F1 Schedule & Community App (Flutter · Firebase · REST APIs · Provider)

- Developed a Flutter mobile app with Jolpica F1 REST API integration, Provider state management, Firebase authentication, and real-time data storage.
- Prevented API rate limiting through efficient data fetching and caching strategies, ensuring smooth performance under continuous usage.

EDUCATION

- COMSATS University Lahore (Software Engineering) - 2022 – 2026 - CGPA: 3.39
- Forman Christian College (Pre-Engineering) - 2020 – 2022 - 78%
- Lahore Grammar School (Matric CS) - 2018 – 2020 - 88.9%

CERTIFICATES

- Introduction to Augmented Reality and ARCore
- Participation in Competitive Programing LOOPVERSE'25
